PROJECTS

E-Commerce Website | ReactJs, Spring-Boot

ongoing

- A college management system where front-end is made entirely in ReactJs and back-end in Spring-Boot. It was a group project. My role in this project was to develop back-end using Spring-Boot and MySQL as database.

Construction Website | Web-Technologies (mini project)

04 2022

- A simple construction website in which the user can book a construction of building with ease, check latest prices in market, check estimated cost for constructing different type of buildings and lot more. Website front-end is made of DHTML and back-end of PHP with MySQL database.

Library Management System | Java, MySQL

09 2020

- A Library Management System where admin can add/delete Librarian and librarian can issue, add, view issued books and return books. Technology used is Java Swing for creating GUI and database used is MySQL.
